THe first day after euery of the Feasts, set downe for euery Tearme, the Court of the Arches is kept in the forenoone in Bow-Church: and the Admirall Court the same day the afternoone in Southwarke. The second day after euery of the said Feasts, the Audience Court is kept in the forenoon in the Consistory in Paules, and the Prærogatiue in the same place in the afternoone. The third following euery of the said Feasts, the Bishop of London his Consistorie Court is holden in Paules, in the forenoone, and his Maiesties Court of Delegats in the same place in the afternoone. The fourth day following the said Feasts, his Maiesties Court of High Commission, is kept in the Consistory in Paules, or as of late yeares at Lambeth, or in the Lord Bishop of London his Pallace on Thursday in the afternoone. But if any of the dayes before recited be Sunday or an Holiday, then is such Court kept the day following. In Hilarie Tearme, foure of the aboue named Court dayes, be ordinarily kept, and as many in Easter, and Trinitie Tearmes: according to the course of the yeare, as the Iudge in the Arches in his discretion shall think good, who at the end of euery Tearme appointeth the Court dayes to be kept in the next Tearme. But in Michaelmas Tearme, the Court dayes for the same before set downe (if as in the rest, of late dayes they be not altered) were certainly kept.

Therefore aduise all Country men (especially those that dwell farre off) being cited by any originall processe to appeare in the Arches, Audience, Prærogatiue, or Delegates, to send to some Doctor a note of the cause, and to what Court they be cited, to appeare for them, and to returne them word of the very day, in which it shall be needfull for them to appeare in person. But in the course of practise in the High Commission, and the Admirall Court it is otherwise, for euery person cited to those Courts, must appeare personally.

The Termes, with the Act, or Commencement dayes, in both the Vniuersities.

HIllary Terme beginneth in both, Ianuary the 13. and endeth at Oxford, the 20. of March. At Cambridge, the 24. of March.

Easter Terme begins in both, Aprill the 7. ends at Oxford the 13. of May. At Cambridge, Iuly the 5.

Trinity Terme begins at Oxford, the 3. of Iune, and ends the 10. of Iuly, but may be prorogued, *ad Magistrorum beneplacitum*.

Michaelmas Terme in both, begins October the 11. and ends December the 16.

The Act or Commencement of Bachilors in both, is the first day of Lent

The Act of Masters, and Doctors in Oxford, is Iuly the 10. in Cambridge, Iuly the 5.

Gene-

Generall Rules of Phyſicke, Husbandry, and Gardening.

CVt no Veyne, nor let Blood, when the Moone is in the place where the inciſion is to be made, neither when the Sun or Moone are afflicted by the malignant Planets, Saturne or Mars: let it be done in the Morning, after Sunriſing and Faſting, if after Noone, then after perfect digeſtion, the ayre being temperate. In letting of Blood a Phyſitian or Chyrurgion muſt be heedfull and carefull of his Patient, for many times, the careleſſe and unlearned by letting of blood, openeth a way to dangerous infirmities, and oft to preſent death. Neither is it conuenient, for a leane & weake man or woman, for any one that is fat and groſſe, nor for a Child under fourteenth yeares of age, to be let blood. It is to be conſidered, how it ſtandeth with the Patient in warely, for his Complexion, and age, for the time of the yeare, and of the day. Therefore it is beſt to let blood, in faire, temperate, and Sun-ſhine weather.

The { Cholericke / Sanguine / Phlegmatick / Melancholie } Moone in { Cancer, Scorpio, or Piſces. / Cancer, or Piſces. / Aries, or Sagitarius. / Libra, or Aquarius. }

For the Phrenſie, Peſtilence, Squinancie, Pluriſie, Apoplexie, a continuall head ach, hot burning Feuer, or any other extreame paine or dangerous diſeaſe, remedy muſt be ſought with all conuenient ſpeed, but then blood is not to be let in ſo great quantity, as if a choſen time might be taken.

Good to { Prepare humours / Vomite, / Purge by Sneezing / Take Glikers / Take Gargariſmes / Stop rheumes & Fluxes / Bathe for Diſeaſes } the Moone in { ♊. ♎. or ♒. / ♈. ♉. or ♑. / ♋. ♌. or ♏. / ♈. ♎. or ♐. / ♈. or ♋. / ♉. ♏. or ♑. / ♈. ♌. or ♐. }

Good to purge, with Electuaries, Potions, or Pils, the Moone in Cancer, Scorpio, or Pisces. A learned Physitian will also consider many other Astrologicall observations necessary in Blood-letting, Purging, and bathing.

Nemo bonus Medicus, Astrologiæ imperitus.

GRaft, and plant Trees, the Moone being new, and in Taurus, Virgo, Scorpio, or Pisces, the wind South, or West.

Remoue, and set young trees, from October till February, in the first quarter of the Moone, the winde at South or West, the weather warme and dry.

Cut Vines in January, or February.

Fell great Timber, in December, and January, in the old of the Moone is best: but if you would haue it grow againe, cut it downe in the new of the Moone.

Cut hedges, betweene the Change and the Full of the Moone, from the end of January, till May.

Set and sow all kind of Seeds, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricorn, Aquarius, or Pisces, but the seeds whose rootes be round, should be sowen, or set, 3. or foure dayes, before, or after the full of the Moone.

Dung Land, that weeds may not abound, in the last quarter of the Moone.

Geld or lib Cattell, the Moone in Aries, Libra, or Sagittarius, before the full Moone; you may let them blood at any time, the Signe not being in the Heart, nor in the place where the incision is to be made, nor in the day of the Change of the Moone.

Sheare Sheepe, cut haires, and sow all manner of Corne in the increase of the Moone.

But gather Fruit, Hearbes, and Flowers to keepe, after the full Moone.

A most necessary Obseruation for the Sowing of Garden seeds.

ALl Pot-hearbes must be sowen thicke, and but thinly couered, all herbes which Cabbage, must be sowen thicke, and deeper couered, and in their remaining planted thin, and well fixed in the earth. All rootes must be sowen deepe, and thin, either let into the ground, or strewed in deepe furrowes digged and layd by for the purpose, after the quantitie of the seed, for so you shall not onely saue much labour, but reape greater profit.

Gathering and preseruing of Fruits.

OF all fruits Cheries (for the most part) be soonest ripe, but not all at one instant. The reddest be alwayes the ripest, and must be gathered by the stalkes, and handled as little as may be. Lay them as thin as you can, lest by taking heat, they soone lose the glory of their colour.

Plums, when no part of the fruit cleanes to the stone, be perfectly ripe. If you gather them before they fall downe of themselues, they may be kept long, being spread thin vpon Nettles, or Vine-leaues.

Peares, must be gathered when they haue their full growth which is, when the kernels ipe hollow in the core, and are blacke on the end: to haue them last the longer, lay them one by another vpon a bored floore, or sleake, made with wands, without straw or fearne.

Apples, being dry gathered, and in the old of the Moone will be best kept, if euery sort be layd by it selfe (without any fallings among them) vpon bare bords, or a plaister floore, till S. Andrews tide, the thinner they lye the better: the place let it be shut close in frosty and extreame weather, and not farre from fire, in faire weather the ayre must be let in, but in the day time for feare of Mouldinesse. In frost to couer them thicke ouer, with fine Hay, or barly chaffe, will not be amisse.

Wardens, will last longest, being gathered in the last quarter of the Moone, layd on dry bords without any couering.

Obser,

A Prognostication.

Obſeruations of Husbandrie, Gardening, and Phyſicke, in euery Month of the yeare.

Ianuary.

IN Ianuary plant, and ſet all ſorts of Quickſets, Roſe-trees, Peach, Filberd and Plum trees. Set, or ſow kernels, and berries of all fruits, Bay trees, Pyne and Box, if the Froſt be not too hard, remoue trees, ſet Peaſe and Beanes, rid fruit trees of ſuperfluous branches, Lop trees, and hedges, drench and geld cattell for to reare. Fallow land for wheat, and Rie. The beſt time to ſet, ſow, remoue, prune, or loppe, is before the Full. Burne ſow Peaſe, dung Land, and fell great Timber in the laſt quarter of the Moone. In this Moneth, and the next, vſe no Phyſicke, but for great neceſſity: Weare warme clothes, and eate meates that be hot. Take heed of cold or wet on your feet, eſpecially if you be troubled with the Rheume.

February.

IN this Moneth, ſet and lay Quickſets. Set, and plant Vines, Oſiers and Roſetrees, Sow Peaſe, beanes, and Beanes, kernels and Muſtardſeed. Plaſh hedges, Caſt vp ditches, and ſet Hoppes. Prouide now to haue ſallets in Summer, Sow Oats in cold and ſtiffe Land.

March.

IN the new of the Moone, (the Wind any part South, or Weſt) Graft Peare, Warden, and Apple trees, and ſow that you left vndone the laſt Moneth. Couer the roots of your trees (which you bared before) with rancke earth, after the full of the Moone. Sow Beanes, Peaſe, Oates, Onions, Parſeneps, Carrets, Cowcumbers, Melons, and all kind of pot hearbs. Slip Artichockes, and Sage. Geld Lambs. Plow Barly land, and in cold clay land ſow it. Let bloud, according to your youth, ſtrength, and neceſſity: the ſigne, and weather being fit. Whatſoeuer diſeaſe cannot in the Spring-time be cured by Phyſicke, will hardly be rid all the yeare after.

Aprill.

Aprill.

SOw Barly Hempe and Flax, and all kinde of seeds left vnsowne the last Month, Pole Hops. Set garden hearbs. Let Tanners now prouide them of Barke, good Huswiues get you about your dairies. Now by the direction of a learned and skilfull Physitian, bleed and purge, and they that haue Aches or be troubled with the Gout, may goe to the Bathes, in this Moneth and the two next.

May.

NOw set, and sow all manner of fine hearbs, and seeds. Sow Flax, and Hempe Weed corne Set Stils a worke. Take Lambs from Ewes. Stirre land for wheat and Rie. Leaue lopping of trees Teach Hoppe to climbe, but cut off the superfluous branches Rise early, and walke in fragrant fields, and by running streames. Sage, and sweet butter is an excellent breakefast. Clarified whey, and Sage ale a most soueraigne drinke.

Iune.

WEed Corne, and Gardens. Sheare sheepe. Get home fewell. Set Rosemary, Carnations, & Gilliflowers. Sow Lettice and Radish, for now they will not run to seed. Make Hay, & cut neither hedge nor trees, during this & the two next months, Beware of great thirst, Vse light, thin, & coole diet.

Iuly.

APply making of Hay. Fallow Land for wheat. Pull Hempe, that is ripe. Gather garden Beanes. Get Rue, and wormewood to strow vpon floores, to driue away fleas, and moathes. Gather flowers, and lay them in the shade till they be almost dry, and then Sunne them a little for feare of corruption. Take heed of suddaine colds, forbeare Lettice. Bleed not, but vpon very vrgent occasions, or necessitie.

Auguſt.

REape wheat, and Rie. Sow winter hearbs, in the new of the Moone. Gather garden seeds. Cut downe Barly and Oates. Forbeare sleepe after meat, in the day time. Vse moderate dyet, and beware of all meats, and Spices, that be inflaming.

Sep-

September.

IN this Moneth, & the end of the former, when Hops war browne, it is time to gather them, the weather faire, & the dew off from the ground, cut them off from the Hils, lay vp the Poles dry, and from the ground least they rot. Hops well dryed on a kill, will last best, kept rather in canuas, than hogsheads, or fats. Gather fruits & make Verjuice, kill Bees. Sow wheat and Rie, in strong and cold clay Land. Remoue and set Slips of all kind of Flowers, betweene the 2. Lady dayes, and remoue trees euery new Moon till February. Set Rose trees, Barberies, Gooseberies, Respas and Strawberies vnder them, may doe well. Bath in hot Bathes for cold causes. Let bloud, & take Physick according to necessity.

October.

NOw sow Wheat, & Rie, the sooner the better for feare of raine. Sow Peares & Nuts. Gather winter fruit the weather being dry, and in the afternoone, in the wane of the Moone. Cut Rose-trees to haue store of Roses, but once in two yeares. Vse meats that are strong and most nourishing, drinke Beere or Ale of indifferent strength. Get warme clothing and good dry shod.

November.

IN the best time to make Malt, to kill Hogs, to trench Gardens with dung, to set Crabtree stocks, and to make Martilmasse Beefe. In hot grounds, sow Wheat, and Rie. Vse wholsome meats, & drinks, & good exercise to preserue health.

December.

IN this and the next Moneth, cut downe great Timber, in the last quarter of the Moone Uncouer the rootes of fruit trees, Fallow land for Barly, set Peafe and Beanes, couer hearbs frō cold, looke well to Cattle, take Fowles with nets and lime twigs, let horses bloud. Let your meat be hot & nourishing, but not such as breedeth Melancholy. The warmth of your body (next to clothing) let it proceed from moderate exercise, for that body can hardly be found, whose shins in Winter, be made pyed, and motly with scorching of the fire.

Of

Of the Lengthening and ſhortning of dayes.

By reaſon of the 3. diuers motions of the Sun, the dayes doe not lengthen, and ſhorten at all times alike. In his ſlow motion he goeth not aboue 55. min. and 18. ſeconds, in 24. houres, and ſometimes but 56. min. and 43. ſeconds. In his ſwifteſt motion he may goe one degrée, and 43. ſeconds in 24. houres. In his meane motion he paſſeth 59. min. and 8. ſeconds in 24. houres. By occaſion of which diuerſitie in his mouing, many things happen, contrary to the opinion of the vnlearned, as there be about 10. dayes more from the Equinox of March, vnto that in September, than there be from the Equinoctiall in September to the ſame in March. By occaſion of which diuerſitie of the Sunnes motion, the vulgar be much deceiued, ſaying, that the dayes doe lengthen and ſhorten an houre euery 15. dayes, which is not true. Indéed from the 11. of March, vnto the 27. of Aprill, that proportion is true, but then from the 27. of Aprill, it muſt be the 17 day of May (which is 20. dayes) before the day be an houre longer, and from the 17. of May (at what time the day is 16. houres long, in the Latitude of 52. & 20. min.) vntill the 12. of Iune, which is 26. dayes, the day is longer but halfe an houre and 3. min. The like it doth in ſhortning.
